Bachelor of Engineering, 2018 – 2022
Hindusthan College of Engineering and technology

Work Experience

GULF INTERNATIONAL BANK, *[Wipro technologies]* 2023 – Present

- Payment services: Provides secure payment processing for businesses and customers, supporting transactions across multiple channels, including bank transfers, credit/debit cards, and digital wallets.
- Card Issuance and Management: Offers comprehensive tools for creating, issuing, and maintaining virtual and physical cards, with features like spending limits, transaction history tracking, and card status updates.

Responsibilites:

- Performed end-to-end testing for GIB Cards modules across SIT and Regression cycles, ensuring stability and accuracy of core banking processes.
- Designed, executed, and automated test scenarios for card transactions and category-related flows, improving overall test coverage and reducing manual effort.
- Validated system integrations between WS02 and Cortex to ensure seamless data flow and accurate transaction processing.
- Identified, analyzed, and reported defects with clear root-cause mapping, collaborating closely with developers and BAs to resolve issues quickly.
- Contributed to cycle activities like ERC by delivering consistent counts, clear evidence, and on-time execution of planned scenarios.
- Worked in several applications like eCollect, vTransact, Cortex, Merchant acquiring systems, Simulators , Flexcube, Postman, FIN, FileAct, H2H, EFMS , 360T and Winscp.

FERGUSON ENTERPRISES, *[Wipro technologies]* 2022 – 2023

- An Intermediate web service between sellers and customers. Led Product Catalog Management, Order Management, Payment Gateway Integration, and Logistics & Delivery Coordination to optimize e-commerce operations.

Responsibilities:

- Tested key retail flows like search, cart, checkout, and order processing to ensure smooth customer journeys.
- Created and executed automation scripts using Selenium to improve test coverage and reduce manual effort
- Validated integrations between UI, backend, and inventory systems to ensure accurate data flow.
- Reported defects with clear details and worked with developers and BAs to verify fixes and close issues.

Declaration

I confirm that the information provided above is accurate to the best of my knowledge and belief. If given the opportunity, I am committed to delivering my best efforts to support the organization's goals.
